## Flash Dryer System

**Grinds, conveys and finish dries in one energy-efficient system.**

**Recirculates 50% of the heated exhaust air to save fuel and odor control costs.**

- The Dupps Ring Dryer Handles any product that can be air entrained—but won't stick to the duct work.
- Because it exposes the material to heat for only a few seconds, the Ring Dryer gives you a cooler product, ready to bag or store, with accurate moisture content and no wet spots.
- Simple and accurate control of moisture content.
- Short exposure to heat retains product digestibility and lysine bioavailability. Finished Product has a light, uniform color.
- Available in an airless configuration for reduced risk of in-system fires, less exhaust and minimal odor control equipment.
