

Mobile Decanter Unit

**Go-anywhere solution
for process and waste
stream separation.**

- Built to handle a broad range of process and waste streams, the Dupps MDU is a complete, self-contained mobile decanting system ready to go to work virtually anywhere on your site.
- Designed for both two- and three-phase operation, it's ideal as a test plant or temporary solution to all kinds of solid/liquid separation applications.
- The heart of the MDU is a dual-drive, solid bowl Dupps-Gratt decanter centrifuge that can handle throughput of up to 150 gallons per minute, depending upon feed stock.
- Includes all necessary material handling equipment, integrated polymer treatment, and a complete on-board process control system.
- The MDU is available for short-term lease or rental.

The Dupps MDU — unsurpassed versatility, performance and dependability.

- 1** The Dupps-Gratt two- and three-phase solid bowl decanter combines proven efficiency and reliability with advanced mechanical separation technology to provide superior performance in a wide range of applications and flow rates. Dual motor drive allows on-the-fly adjustment for changes in feed solids content and solids discharge dryness.
- 2** The on-board automated control system provides adjustment and monitoring of all equipment and processes.
- 3** The MDU features a built-in polymer application system, complete with integrated flow metering, flow display and proportional control, to aid in the separation of solids from the process or waste stream.
