

DUPPS PRESSOR® SQUEEZES MORE PROFIT FROM OIL SEEDS

Grow your oil extraction profits with the high-volume, high-quality, high-tech Dupps Oil Seed Pressor®. This USA-made press is ideal for soybean, canola/rapeseed, sunflower and many other Identity Preserved crop products.

Higher Production

Old expeller-type technology often tops out at 1,000-1,500 pounds per hour: about 18 tons per day at best. A single Pressor can process up to 130 tons per day depending upon feedstock and product specifications.

Precise Oil Residuals

You can configure Dupps Pressors for just the right amount of oil residual to maximize your profits —

- Adjust for as low as 5% residual for up to 2,000 lbs more oil per day.
- Configure for high fat meal.
- Special configuration for High Bypass Meal.

Proven Reliability, Dependable Service

In operation since 1989, the Dupps Oil Seed Pressor was designed for a lifetime of reliability. Unlike some foreign-made presses, you can depend on maximum uptime with rapid-response service and support.

Easy Operation

A simplified design features a large feed hopper that eliminates the need for a down feed and drive. An extra-rugged gear box (designed and built by Dupps) and heavy-duty bearings run in oil to minimize maintenance.
